Getting Started

Our Atlantis app is embedded in the larger platform Grid Solutions Online Store (OLS).

To access and navigate with the app, you need to be already registered.

If so, you should have been received an email with your User ID and link to create a new Password.

If not, you have to request a login and account setup as per the specific procedure from Atlantis Home Page – bottom left corner.

Welcome to...ATLANTIS...a Services app from GE Vernova – Electrification – Grid Solutions – Power Transmission

Our Customers require an optimal spare parts management to maintain and repair during planned and unexpected outages ... and with this app, we offer you the opportunity to lookup loose parts or kits - through navigation by drawings or by a tree structure or through a search bar - to facilitate the identification of parts or kits and then to simplify the order process.

It applies to air-insulated switchgear, gas-insulated substations, power transformers from GE legacy brands including Alstom, Areva, Alstom, GEC Alstom, AEO, Sprecher+Schuh, Sprecher Energy, Scorch and Cegelec.

FLASH NEWS:

FIRST LOGIN:

- Users internal to GE Vernova: Please create an IT ticket to access to the app (through MyTech)
- Users external to GE Vernova: Please follow the instruction [here](#)

RESOURCE:

- In/ Out Scope: [here](#)
- Internal GE Vernova User Guide: [here](#)
- External (Non GE Employee) User Guide: [here](#)

Once request done as per procedure and once you receive the confirmation by email of your User ID and Password (it will take at least 1 day – or more), you can continue with the following steps.

Connect – How to Log In (Accounts already created)

Start Navigating

Welcome to... ATLANTIS... a Services app from GE Vernova - Electrification - Grid Solutions - Power Transmission

Our Customers require an optimal spare parts management to maintain and repair during planned and unexpected outages ... and with this app, we offer you the opportunity to lookup loose parts or kits - through navigation by drawings or by a tree structure or through a search bar - to facilitate the identification of parts or kits and then to simplify the order process.

It applies to air-insulated switchgear, gas-insulated substations, power transformers from GE legacy brands including Alstom, Areva, Alstom, GEC Alstom, AEG, Sprecher+Schuh, Sprecher Energy, Scorch and Ceglec.

FLASH NEWS:

FIRST LOGIN:

- Users internal to GE Vernova: Please create an IT ticket to access to the app (through MyTech)
- Users external to GE Vernova: Please follow the instruction here

RESOURCE:

- In/ Out Scope: here
- Internal GE Vernova User Guide: here
- External (Non GE Employee) User Guide: here

In case you land in the **Online Store Home Page** (here below) inadvertently, please click “**HV Parts & Services**” in the head banner, and then “**Loose Parts Lookup (Atlantis)**”. You will be brought back to the previous **Atlantis Home Page**.

Loose Parts Lookup (Atlantis)
Power Transformer

Click on button “**Start Navigating**” on top right corner of **Atlantis Home Page** to start with app.

So you will be landed in the **Atlantis 1st Page** here after and you can click on any of the 3 buttons to login.

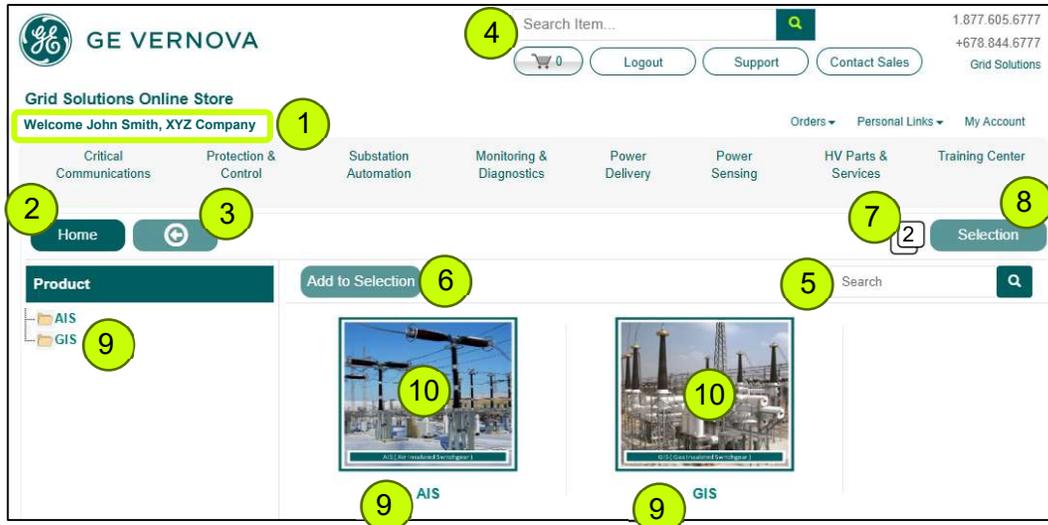

The following popup window will appear showing 2 ways to sign in:

- In the left side for External Users to GE Vernova using your **User ID** and **Password** and finishing by clicking on button “**Sign In**”
- In the right side for GE Vernova employees using the **SSO registration**

TIP: If you need a new account, or have trouble logging in, please do not use the “Register” button. Instead, follow the specific procedure from **Atlantis Home Page** – bottom left corner.

Once you are correctly logged in, you will see your name and company at the top of the screen (1).

General TIPS:

Clicking on **“Home”** button (2) will land you in **Atlantis 1st page** (the one you see about).

Clicking on **“Return”** button (3), you will land in the previous page where you navigated.

Do not use the TOP search bar (4) as it is related to search in global OLS app and not Atlantis app ... but use the one in (5).

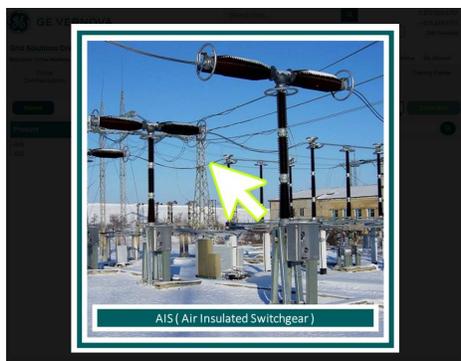

To add the parts you are looking for into a Selection List, you can use the button **“Add to Selection”**.

You can see the selected parts number on your list by looking to the number visible on (7).

If you want to see your Selection List, you can click on button **“Selection”** (8).

Clicking on text (9), you will navigate.

Clicking on image (10), you will see it enlarged. With this, you can get a clearer view of the thumbnail in a popup window. Clicking on image again, you will return to the previous page.

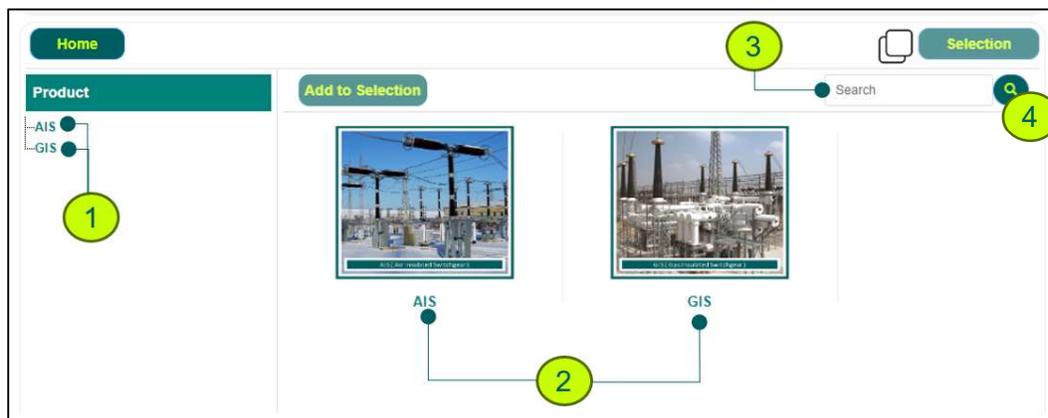

Navigate – How to find parts?

Find the right parts or kits for your need with just few clicks.

You can navigate through parts by clicking either the hierarchy on the left (1) – called “navigation by tree”,

Or by clicking the text under the images on the right (2) - also called “navigation by pictures”.

Alternatively, you can also do a search using the search text bar (3).

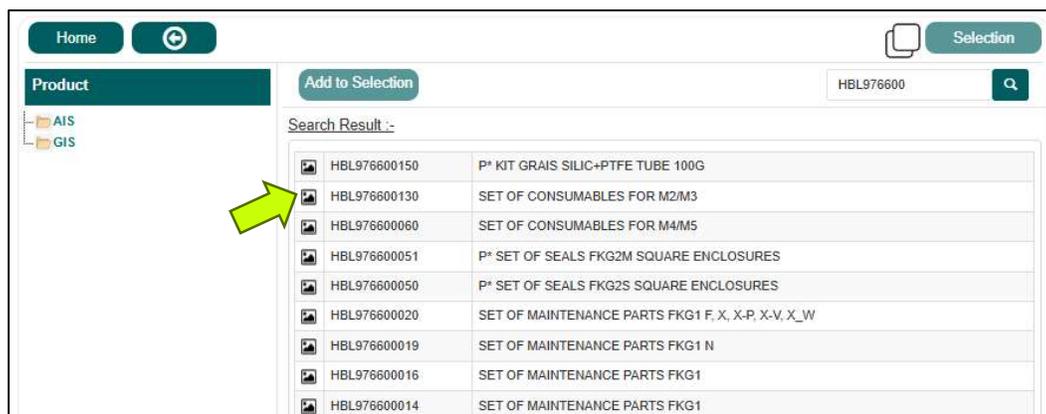

Find a part by Drill Down

Continue to navigate through the hierarchy with (1) and/or (2) – by clicking on the texts and not on images - until you reach the part you are looking for.

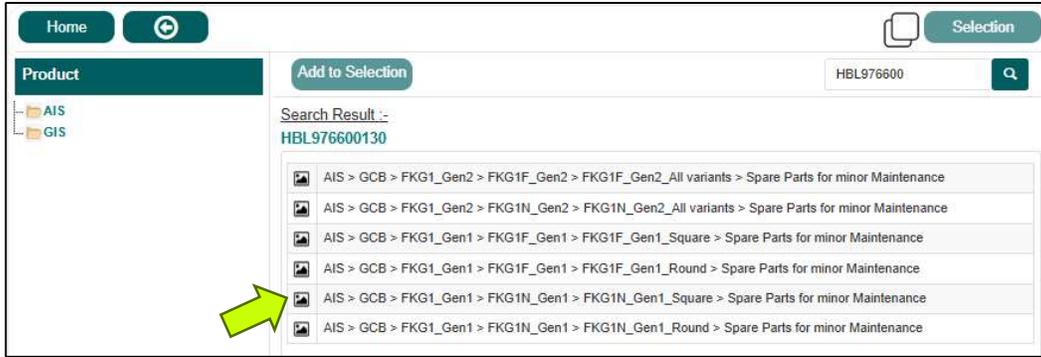

Find a part by Search text bar

Do a search using the **search text bar** (3) and validating by clicking on the **magnifying glass symbol** (4).

If the search will find multiple results, please select the result you want by clicking on the image on the desired line:

If this part is called in different hierarchies, you will see then multiple lines as follows and then click on the image on the desired line:

Then the part you are looking for will appear with its thumbnail:

Select – How to get a selection list?

Put the parts you are looking for into a selection list

Making Selections

Once you have navigated to the lowest level, the part thumbnail will appear with a small checkbox on the lower left side. Click the checkbox to choose the part (1).

Upon clicking the checkbox, the “Add to Selection” button will be enabled (2) and clicking it will add that given selected part to your selection list and then the number of parts on your selection list start to increment (3).

You can continue your navigation and selection of next part using the “Home” button (4) to restart navigating through images or clicking on tree navigation (5) or using the search bar (6).

Viewing the Selection List

At any time, you can see your selection list by clicking on button “Selection” (7).

Moving to a new page, there will be summary tables that list the parts into 2 categories.

The screenshot shows the 'Selections' page with a table of selected parts. The table is divided into two sections: 'Parts from Catalog' and 'Parts Out of Catalog'. The 'Parts from Catalog' section has two rows, and the 'Parts Out of Catalog' section has one row. A yellow watermark 'To be replaced by right one' is overlaid on the table.

Action	Part Code	Part Designation
<input type="checkbox"/>	HBL976600130	SET OF CONSUMABLES FOR M2/M3
<input type="checkbox"/>	HBL976600050	P* SET OF SEALS FKG1S SQUARE ENCLOSURES

Action	Part Code	Part Designation
<input type="checkbox"/>	HE400466168	REPLACEMENT KIT DENSITY SENSOR

The parts are classified as in “Catalog” or “Out of Catalog”. This means that :

- some parts (Parts from Catalog) are already included in our GE Vernova internal catalog of recurrent parts for which we have already an accurate price and accurate delivery time
- other ones (Parts Out of Catalog) are NOT included in our GE Vernova internal catalog of recurrent parts and we need to consult our suppliers on case by case to get an accurate price and accurate delivery time

Cleaning the Selection List

Ticking the boxes in front of the parts you finally do not want to keep in selection and then click on button “**Clear Selection**”.

If you want to clear the FULL list, then click first on button “**Select All**” and then click on button “**Clear Selection**”.

Exporting Selections

To export your selection list into an Excel sheet, click on button “**Export to Excel**”.

Important note about pricing (not included here):

For the time being, the scope is limited to only technical aspects – no prices. If you would like a commercial offer for the parts you have identified in Atlantis, please contact your GE Vernova – Grid Solutions Sales representative.
