

INSTRUCTIONS

GEK- 27988
Insert Booklet- GEH-2026

NEGATIVE-PHASE-SEQUENCE
TIME OVERCURRENT RELAY
12INC77C
TYPE INC RELAY

INTRODUCTION

This supplement in addition to GEH-2026 constitutes the instructions for 12INC77C type INC relay.

DESCRIPTION

Relay 12INC77C is similar to 12INC77B except as follows:

1. The alarm unit will operate on negative-phase-sequence current (0.04-.15 per unit range)(tap-current base).
2. The internal connections as shown in Figure 1 of this supplement.

These instructions do not purport to cover all details or variations in equipment nor to provide for every possible contingency to be met in connection with installation, operation or maintenance. Should further information be desired or should particular problems arise which are not covered sufficiently for the purchaser's purposes, the matter should be referred to the General Electric Company.
